

## **RidgeTech Automation Inc. Now A Fanuc Robotics Authorized System Integrator**

RidgeTech Automation Inc. is excited to announce our inclusion in the Fanuc Authorized System Integrator Program. RidgeTech was invited into the program earlier this summer with everything becoming official at the end of July. We are thrilled to have been considered for this exclusive group of integrators and our team is eager to start helping more customers with their Fanuc robot applications. Fanuc Robotics offers the most complete range of industry-leading products and services for robotics, CNC systems, and factory automation solutions. They are a world leader in the robotic industry and we are proud to be working with Fanuc to support both machine builders and end users alike with their automation projects. Our technicians have many years of experience configuring and programming Fanuc robots but this new partnership will allow us to elevate the level of service we provide by letting us invest in more customized training for our employees and granting us access to a greater range of technical support products. We want customers to purchase Fanuc robots with the confidence that they are not only buying a high quality product but that they will be supported with a network of knowledgeable and competent people. RidgeTech is capable of handling a wide range of robotic applications including assembly, glue application, material handling, MIG & spot welding, palletizing, riveting and vision related projects.

Please feel free to contact us today if you have any questions or require support on a Fanuc related application.

Sincerely,

Mike Wood  
President  
RidgeTech Automation Inc.
