

### **RidgeTech Automation Inc. Expands Into New Office Space:**

On behalf of RidgeTech Automation Inc., we are very pleased to announce that due to our rapid growth over the past year and a half, we are moving to a larger location. As of August 1, 2015, we will be operating out of 250 Royal Oak Road in Cambridge, Ontario, Canada. The building is home to a very well-known and well-respected multi-trade industrial contractor, Trade-Mark Industrial, which purchased the facility last year. We have leased 3,000 sq. ft. of office space and are thrilled with both the building and the location. The space is exactly what we were looking for, and the location keeps us close to Highways 401 and 8, thus making it easily accessible for customers and employees.

We are also very excited about the incredible history that this facility brings with it. Many people in the automation industry will recognize that 250 Royal Oak Road was once the home of ATS Automation. Several members of our team have worked in this building over the years on various projects, and there is a sense of pride among them to be bringing a small part of that automation history back to the building.

We would like to extend a very special “thank you” to our clients for their support over the past year. We truly do appreciate your trust in us and we will continue to work hard to provide top-quality control system solutions. This move will enable us to continue to grow our team and provide even more services in the future.

We encourage everyone to stop by after August 1 to tour the new office and meet our team. If anyone has any questions, please feel free to contact any member of the RidgeTech team.

Sincerely,

Mike Wood  
President  
RidgeTech Automation Inc.
